

ITT Technical Institute
IS3350T
Security Issues in Legal Context
Onsite Course

SYLLABUS

Credit hours: 4.5

Contact/Instructional hours: 72 (36 Theory Hours, 36 Lab Hours)

Prerequisite(s) and/or Corequisite(s):

Prerequisites: NT2580T Introduction to Information Security or equivalent, IS3110T Risk Management in Information Technology Security or equivalent

Course Description:

This course provides an overview of legal processes involved in implementing and maintaining information systems security. Students will study security violations and breaches in relation to pertinent laws and regulations, and will use case studies to analyze legal impacts of information security issues.

Where Does This Course Belong?

This course is required for the Bachelor of Science in Information Systems Security program. This program covers the following core areas:

- Foundational Courses
- Technical Courses
- BSISS Project

The following diagram demonstrates how this course fits in the program:

Course Summary

Course Description

This course provides an overview of legal processes involved in implementing and maintaining information systems security. Students will study security violations and breaches in relation to pertinent laws and regulations, and will use case studies to analyze legal impacts of information security issues.

Major Instructional Areas

1. Legal aspects of information security concepts
2. Privacy laws and issues
3. The American Legal System
4. Laws addressing information security and privacy
5. Intellectual property rights and cyberspace law
6. Risk analysis, incident response, and network forensics investigations

Course Objectives

1. Recognize the legal aspects of the information security triad: availability, integrity, and confidentiality.
2. Examine the concept of privacy and its legal protections.
3. Identify the basic components of the American Legal System.
4. Describe legal compliance laws addressing public and private institutions.
5. Analyze intellectual property laws.
6. Describe the role of contracts in online transactions and cyberspace.
7. Identify cybercrime and tort law Issues in cyberspace.
8. Examine the principles requiring governance of information within organizations.
9. Identify risk analysis and incident response procedures.
10. Explain the importance of forensics examination in legal proceedings.

Course Plan

Instructional Methods

This course is designed to promote learner-centered activities and support the development of cognitive strategies and competencies necessary for effective task performance and critical problem solving. The course utilizes individual and group learning activities, performance-driven assignments, problem-based cases, projects, and discussions. These methods focus on building engaging learning experiences conducive to development of critical knowledge and skills that can be effectively applied in professional contexts.

Suggested Learning Approach

In this course, you will be studying individually and within a group of your peers. As you work on the course deliverables, you are encouraged to share ideas with your peers and instructor, work collaboratively on projects and team assignments, raise critical questions, and provide constructive feedback.

Important: Keep the deliverables you completed for earlier units as you may need them for working on the tasks assigned in later units of this course.

Use the following advice to receive maximum learning benefits from your participation in this course:

DO	DON'T
<ul style="list-style-type: none"> ▪ Do take a proactive learning approach ▪ Do share your thoughts on critical issues and potential problem solutions ▪ Do plan your course work in advance ▪ Do explore a variety of learning resources in addition to the textbook ▪ Do offer relevant examples from your experience ▪ Do make an effort to understand different points of view ▪ Do connect concepts explored in this course to real-life professional situations and your own experiences 	<ul style="list-style-type: none"> ▪ Don't assume there is only one correct answer to a question ▪ Don't be afraid to share your perspective on the issues analyzed in the course ▪ Don't be negative towards the points of view that are different from yours ▪ Don't underestimate the impact of collaboration on your learning ▪ Don't limit your course experience to reading the textbook ▪ Don't postpone your work on the course deliverables – work on small assignment components every day

Course Outline

Unit #	Unit Title	Assigned Readings	Graded Activities			
			Grading Category	#	Activity Title	Grade Allocation (% of all graded work)
1	Information Systems Security Overview	<i>Legal Issues in Information Security:</i> ▪ Chapter 1	Discussion	1.1	Availability, Integrity, and Confidentiality	1
			Lab	1.2	Create an IT Infrastructure Asset List & Identify Where Privacy Data Resides	2
			Assignment	1.3	Executive Summary on Risk Analysis	2
<i>Course Project and associated deliverables are introduced in Units 1 - 2.</i>						
2	Privacy Overview	<i>Legal Issues in Information</i>	Quiz	2.1	Quiz 1	2

Unit #	Unit Title	Assigned Readings	Graded Activities			
			Grading Category	#	Activity Title	Grade Allocation

Evaluation and Grading

Evaluation Criteria

The graded assignments will be evaluated using the following weighted categories:

Category	Weight
Assignment	20
Lab	20
Project	22
Discussion	6
Quiz	8
Exam	24
TOTAL	100%

Grade Conversion

The final grades will be calculated from the percentages earned in the course, as follows:

Grade	Percentage	Credit
A	90–100%	4.0
B+	85–89%	3.5
B	80–84%	3.0
C+	75–79%	2.5
C	70–74%	2.0
D+	65–69%	1.5
D	60–64%	1.0
F	<60%	0.0

Academic Integrity

All students must comply with the policies that regulate all forms of academic dishonesty, or academic misconduct, including plagiarism, self-plagiarism, fabrication, deception, cheating, and sabotage. For more information on the academic honesty policies, refer to the Student Handbook.
